

Tecnokel Amino Zn	
PFC 1(C)(II)(a): STRAIGHT INORGANIC MICRONUTRIENT FERTILISER Inorganic micronutrient fertiliser, Zn 8	
DECLARED CONTENT: 8.0 % w/w Water-soluble zinc (Zn) from sulphate	
<u>Ingredients:</u> Zinc sulphate (CAS 7446-19-7) ^(a) ; Fermentation extract (EC 932-215-9) ^(b) ; Glycine (CAS 56-40-6) ^(a) ; Enhancer compounds (CAS 526-95-4; CAS 64-02-8) ^(a) ^(a) CMC 1: Virgin material substances and mixtures; ^(b) CMC 6: Food industry by-products	
PRODUCT DESCRIPTION Fertilizer specifically formulated for the prevention and rapid correction of zinc deficiencies.	
INSTRUCTIONS AND APPLICATION RATES Tecnokel Amino Zn is designed for foliar application , thanks to its excellent penetration and translocation within the plant. This method is recommended for fast and efficient action. Soil application is also possible if soil conditions—especially pH—are suitable for zinc availability and nutrient uptake by roots. The product can be applied throughout the crop cycle, with particular emphasis during the early stages of development and flower formation. Keep in mind that hidden zinc deficiency (hidden hunger) may occur without visible symptoms, reducing crop yield, so seeking professional advice is recommended when in doubt.	
Recommended foliar doses: • 0.2% - 0.4% (200–400 cc per 100 L of water) • Hidden deficiency (hidden hunger): 1–2 L/Ha • Visible deficiency (symptomatic): 2.5–3 L/Ha	
Recommended soil doses: • 5–10 L/Ha.	
<u>Observations:</u> • TO BE USED ONLY WHERE THERE IS A RECOGNIZED NEED. DO NOT EXCEED THE APPLICATION RATE. • Contact company or company's distributor for more specific recommendations in case of mixing with other fertilising products.	

- Compatibility with other agricultural products. In case of mixing, it is the responsibility of the user to test the mixture before application. Manufacturer's responsibility is limited to the warranty of the product in its original packaging.

STORAGE CONDITIONS

Once diluted, use the product, do not store the solution.

Protect from direct sunlight and keep in a dry place at an ambient temperature between 5 ° C and 35 ° C in a dry and well-ventilated place.

The product does not require special storage measures. As general storage measures, sources of heat, radiation, electricity and contact with food should be avoided.

Once the containers are open, they must be carefully closed and placed vertically to prevent spills.

INFORMATION ON SAFETY AND ENVIRONMENT

To avoid risks to human health and the environment, please comply with the recommended use instructions of this fertilising product.

Danger

H317 May cause an allergic skin reaction. H318 Causes serious eye damage. H411 Toxic to aquatic life with long lasting effects. P261 Avoid breathing vapours. P273 Avoid release to the environment. P280 Wear protective gloves, protective clothing, eye protection and face protection. P305+P351+P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. P310 Immediately call a POISON CENTER or doctor. P501 Dispose of contents and container in accordance with all local and national regulations. Contains: tetrasodium ethylene diamine tetraacetate; octhiline (ISO),2-octyl-2H-isothiazol-3-one; zinc sulphate.
